

12.09.2018 | Takeover of Passenger Information Systems

LÜTZE takes over the Passenger Information of PICASO

Rail equipment specialist LÜTZE Transportation takes over the Passenger Information Systems division of PICASO Systems.

Weinstadt: Lütze Transportation GmbH, part of the LUETZE International GmbH, will be taking over the Passenger Information Systems division of PICASO Systems GmbH in Cologne as of 1st July 2019. This marks an expansion of LÜTZE's product portfolio for rail vehicles, which not only includes control equipment, interface equipment and signaling technology, but will also include passenger information solutions in the future.

The new product field includes information systems for passengers, audio systems for announcements, digital and car-specific announcements, passenger and driver intercoms, signal generators and horns, and also Ethernet infrastructure. "LÜTZE's investment in the passenger information field sends a clear message of its ambitions in the rapidly growing, future-oriented and sustainable rail sector," says Udo Lütze, owner of Luetze International GmbH.
