

30.08.2018 | LÜTZE Transportation GmbH at the INNOTRANS 2018 Hall 6.2/203 Norm ISO/TS 22163

LÜTZE Transportation complies with the new standard ISO/TS 22163

Rail technology specialist LÜTZE Transportation is ISO/TS 22163 certified since May 2018.

With the International Railway Industry Standard (IRIS) UNIFE has created an internationally valid specification for the quality management systems of rail manufacturers and suppliers. The first version of the IRIS standard was published in March 2006. Back then, LÜTZE documented its successful commitment to the rail vehicle industry through successful certification, as one of the first 25 companies in the world.

With the publication of the ISO/TS 22163:2017 the recognized private sector IRIS standard became the international norm in May 2017. As in the past, LÜTZE TRANSPORTATION was one of the first company which implement the new requirements.

Thanks to the continuous optimization of all business processes within the scope of the permanently current IRIS certification, highest quality requirements of all products and services can be guaranteed from LÜTZE TANSPORTATION.
